Access File Analytics..... 1

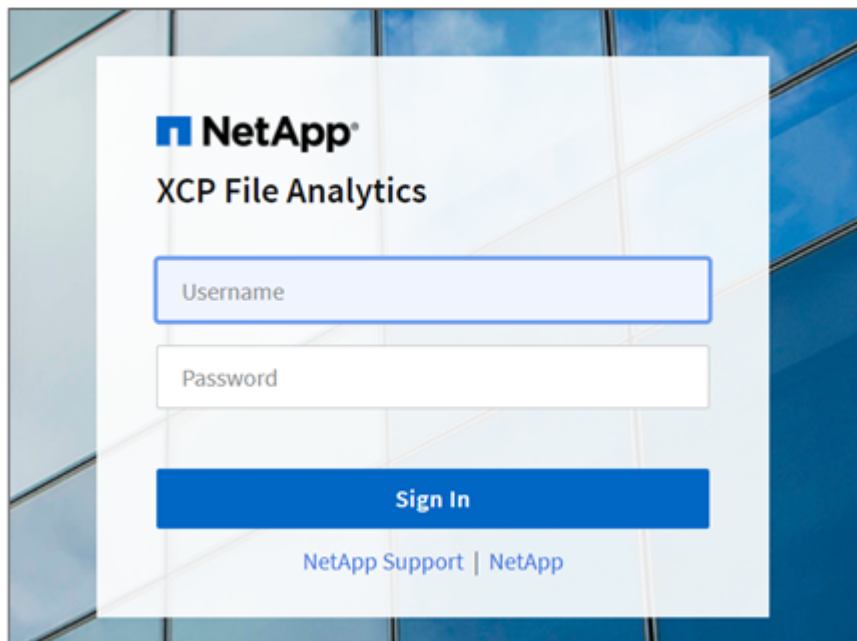

Access File Analytics

XCP File Analytics GUI provides a dashboard with graphs for visualizing File Analytics. The XCP File Analytics GUI is enabled when you configure XCP on a Linux machine.

See the NetApp IMT to check the supported browsers for accessing [File Analytics](#).

1. Use the link `https: //<IP address of linux machine>/xcp` to access the File Analytics GUI. When prompted, accept the security certificate:
 - a. Click Advanced below the privacy statement.
 - b. Click the proceed to `<IP address of linux machine>` link.
2. Log in to the GUI using the username “admin” and the password you set during configuration

3. On login, you can see that the NFS agent is added: a green tick is present showing minimal system configuration of the Linux system and XCP version.
4. If you have configured an SMB agent, you can see the SMB agent added in the same agent card.
